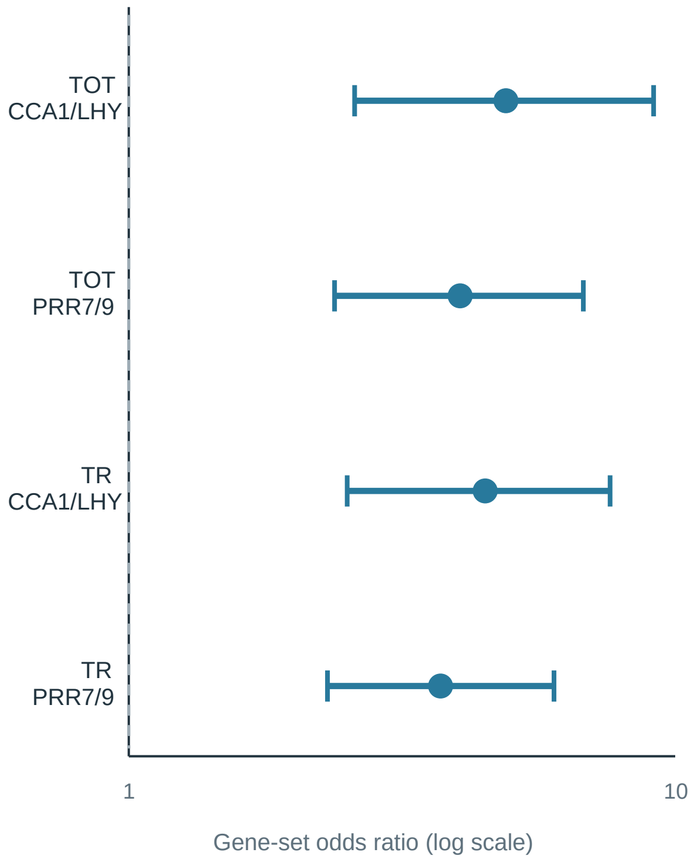
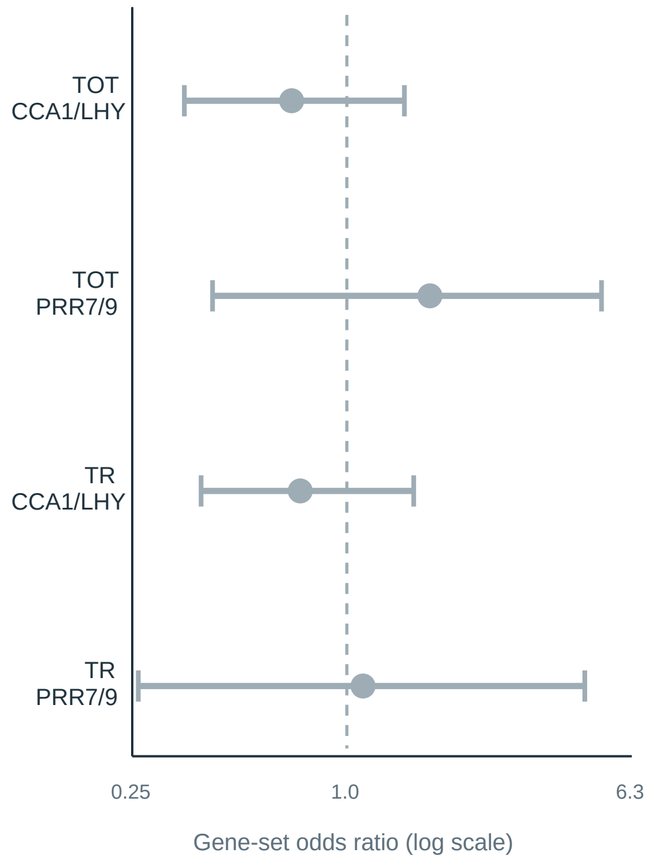
a External heat response



b Genotype under heat



c Supported interpretation

Phase candidates

GSE158444: 117 total; 138 translating

Heat association

GSE116004; OR 3.72-4.90

Heat-program association supported

Clock-specific mechanism unconfirmed

Heat-response enrichment: BH q = 4.43e-9 to 8.43e-9

Genotype-under-heat tests: q = 0.870 in all four tests
